Lock Setting [y/n]

Push Notifications [y/n]

Reminders

Email [y/n] [fill if yes]

Phone [y/n] [fill if yes]

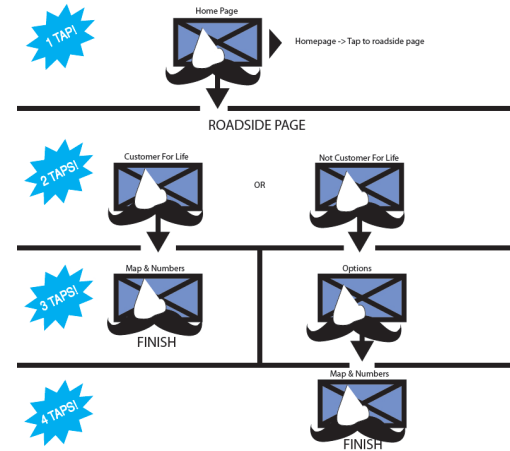

SMS [y/n] [fill if yes]

iCal [y/n] [fill if yes] (do we use a calendar?)

Tracking GPS [y/n]

Preferred Roadside Assistance [dial]

### Team 4: Roadside Assistance

Our idea for the "ROADSIDE" page is that it will give the user 2 options upon landing. One button for CFL the other for alternatives. If they are a CFL member the next page will have a GPS along with their CFL number and the phone number they need to call. Otherwise they will first choose their desired provider, then they'll get the GPS + number screen.

Team 2: Service  
 I did not receive a model from
