Example of work:

toddhartsfield.com || http://about.me/todd_hartsfield

1------------------------
Static website CSS2/W3C/cross browser compliant from 2009:

http://dtc-wsuv.org/thartsfield/eis/index.html
2------------------------

My first portfolio attending WSUV, fall 2010:

http://dtc-wsuv.org/thartsfield/fall2010/index.html
The site above has an external CSS file (which can obviously be viewed from viewing the source- but this link shows it color coded:
http://pastebin.com/DVQMyjkv
Flexible design code from CSS:
http://pastebin.com/kmSXkPHv
3------------------------

Highway 30 tour App for iPhone
http://itunes.apple.com/us/app/highway-30-tour/id488032509?mt=8
4------------------------

Narrative webpage that is flexible for the iPad; experimented with video:
http://dtc-wsuv.org/thartsfield/
5------------------------

Customized PHP if statement in WordPress:
http://pastebin.com/cqZygRPQ --- see http://dtc-wsuv.org/steamworks/steamworks-web/digitalcommons/

WordPress header calling jQuery:
http://pastebin.com/qMTn5PT3
WordPress custom template example:
http://pastebin.com/rDtUM3nK lines 37-40 commented out and CSS displays for the breadcrumbs to display: none;

6------------------------

Newest project experimenting with my JavaScript skills. I created all the graphics and code in order for the lottery numbers to generate:
http://dtc-wsuv.org/thartsfield/powerballgen/index.html
